

Portfolio SQL Architect 2026 - Marcin Pytlik

MARCIN PYTLIK

SQL Architect 2026 | Database Engineer | Microsoft Certified Trainer

Selected projects, competencies, expert experience and training activity within the Microsoft Data Platform ecosystem.

Milewo / Sochocin, Poland | +48 785 889 888 | Marcin.pytlik@pracowniait.com | pracowniait.com

PORTFOLIO PROFILE

This portfolio presents selected areas of Marcin Pytlik's experience as a SQL Server architect, database consultant, Microsoft trainer and practitioner of Microsoft solutions. It complements the short recruitment CV and shows a broader context of projects: architecture, operations, migrations, high availability, SharePoint/Microsoft 365, training and industry presentations.

Specialization axis: SQL Server, business-critical environments, migrations, performance diagnostics, application integrations, SSIS, SharePoint and Microsoft 365.

EXPERT POSITIONING

- SQL Server architect and consultant with over 20 years of experience in Microsoft environments.
- Production practitioner: design, operations, troubleshooting, modernization and migrations.
- Trainer and lecturer: translating complex technical topics into workshops, labs and educational materials.
- Combines the perspectives of DBA, developer, infrastructure architect and business consultant.

KEY COMPETENCE AREAS

SQL Server and data platform	SQL Server architecture, administration, migrations, optimization, T-SQL, SQL Agent, SSIS, backup/restore, HA/DR, SQL Server clusters.
Diagnostics and performance	Production issue analysis, query tuning, instance and database configuration, operation of business-critical environments.
Applications and integrations	C#, ASP.NET Core, Entity Framework, PowerShell, ETL processes, automation, application and reporting integrations.
Microsoft 365 / SharePoint	SharePoint Server/Online, Teams, Power Automate, Exchange Online, migrations, implementation and administration of Microsoft 365 environments.
Training and technical communication	Microsoft Certified Trainer, academic lecturer, author of training materials, conference speaker.

KEY DIFFERENTIATORS

- Experience in SQL Server and Microsoft projects across financial, corporate, public and educational sectors.
- High availability projects: SQL Server clusters, NLB, IIS, backup, storage and Windows Server environments.
- Long-standing training practice as a Microsoft Certified Trainer and author of technical courses.
- Author of the book "Office 365 w małej organizacji" published by Helion.
- Speaker at industry events including Microsoft Security Summit & Developer Days, ShareCon365, Microsoft Data Summit and Warsaw IT Days.

CURRENT PROFESSIONAL PROFILE

mBank - SQL Architect | 2025 - present

- Designing SQL Server-based solutions and participating in database environment architecture analysis.
- Technical consulting, complex issue analysis and recommendations for production environments.
- Supporting decisions related to configuration, migration, security and operation of the SQL Server platform.

Unum - SQL Developer and Management | 2021 - 2025

- Development and maintenance of SSIS packages and SQL Server-based solutions.
- Consulting in optimization, new installations, migrations and infrastructure modernization.
- Assessment of existing environments, problem identification and preparation of technical recommendations.

Microsoft Certified Trainer | 2004 - present

- Delivery of technical training in Microsoft technologies, especially SQL Server, SharePoint, Microsoft 365, administration and development.
- Preparation of original training materials, labs, checklists and implementation scenarios.

Academic and training activity

- Warsaw University of Life Sciences (SGGW), 2010-2016: software engineering, data warehouses, MS SQL Server database administration.
- Warsaw School of Computer Science (WWSI): lectures and classes in SQL Server, database administration and C# programming.
- WSB University, 2018-2022: original course "Planning and designing security mechanisms for cloud services".
- Individual training and consulting on SQL Server migration plans for public institutions.

COMPACT EXPERIENCE TIMELINE

- 7 Dots, Polkomtel, ITEXPERT, KRM Poland and own consulting activity - Microsoft 365, SQL Server, SharePoint, Windows Azure, .NET, IIS and high availability solutions.
- Polkomtel - administration and development of applications on MS SharePoint 2010/2013, migrations, maintenance and code review delivered by subcontractors.
- KRM Poland - SharePoint 2010 farm implementation for around 1,500 employees in multiple European countries and integration with DAX Enterprise Portal.
- Softex / earlier roles - design of backup, storage, Microsoft solutions, .NET applications and network environments.

SELECTED PROJECTS - SQL SERVER, HA, MIGRATIONS, INFRASTRUCTURE

Project	SQL Server cluster installations and configurations for financial and corporate organizations
Role	Architect / consultant / implementer
Scope	Design and launch of high-availability environments, SQL Server component configuration, environment validation and handover support.
Technologies / value	SQL Server, Windows Server, Failover Cluster, backup, storage, HA/DR. Value: improved availability of database services and a more structured platform for business-critical systems.

Project	SQL Server migrations and modernization projects
Role	SQL Server consultant
Scope	Current-state analysis, migration path planning, preparation of recommendations, support for transition to newer environments and reduction of operational risk.
Technologies / value	SQL Server, T-SQL, backup/restore, configuration analysis, migration plan. Value: reduced risk, prepared procedures and increased predictability of migrations.

Project	Administration and implementation of transactional replication
Role	SQL Server administrator / consultant
Scope	Administration of SQL Server environments and implementation of transactional replication in a multi-server setup.
Technologies / value	SQL Server, transactional replication, monitoring, operations. Value: improved data distribution between servers and support for business processes.

Project	Backup, storage and disaster recovery environments
Role	Project manager / consultant
Scope	Backup system projects, storage solutions and disaster recovery environments for commercial organizations.
Technologies / value	Backup, storage, Windows Server, Microsoft solutions, server infrastructure. Value: increased environment resilience and improved data recovery process.

SELECTED PROJECTS - SHAREPOINT, MICROSOFT 365, POWER PLATFORM

Project	SharePoint 2010 farm implementation for around 1,500 users in multiple European countries
Role	Administrator / developer / consultant
Scope	Design, implementation and development of a SharePoint farm, integration with DAX Enterprise Portal and development of applications supporting business processes.
Technologies / value	SharePoint 2010, SQL Server, DAX Enterprise Portal, business applications. Examples: HelpDesk, sales application logs, leave management, invoice approval.

Project	SharePoint migrations 2007 -> 2013 and 2016 -> 2019
Role	Consultant / administrator
Scope	Farm analysis, migration planning, updates, configuration error remediation and support for moving environments between Active Directory domains.
Technologies / value	SharePoint Server, SQL Server, Active Directory, Windows Server. Value: modernization of collaboration platforms and reduction of technical debt.

Project	Office 365 / Microsoft 365 for smaller organizations and schools
Role	Consultant / implementer / trainer
Scope	Tenant creation, user account setup, Exchange Online, SharePoint Online and Teams configuration, Office deployment to workstations and user training.
Technologies / value	Microsoft 365, Exchange Online, SharePoint Online, Teams. Value: fast launch of collaboration and communication environments.

Project	Business processes in Power Automate
Role	Analyst / consultant / implementer
Scope	Analysis and development of business processes, processing Microsoft Forms data into SharePoint Online, alerts and file handling.
Technologies / value	Power Automate, Microsoft Forms, SharePoint Online, Microsoft 365. Value: automation of repetitive processes and reduction of manual work.

SELECTED PROJECTS - APPLICATIONS, INTEGRATIONS, REPORTING

Project	Business applications supporting organizational processes
Role	Developer / designer / consultant
Scope	Design and development of applications supporting business processes, including HelpDesk, leave management, invoice approval and sales application logs.
Technologies / value	C#, .NET, SharePoint, SQL Server, internal applications. Value: process digitization and better information flow control.

Project	Reporting systems based on reporting services
Role	Designer / administrator
Scope	Design and installation of reporting systems based on reporting services and integration with existing infrastructure.
Technologies / value	SQL Server, Reporting Services, SharePoint, Windows Server. Value: structured access to reporting data and support for business decisions.

Project	High availability solutions for Microsoft environments
Role	Consultant / architect
Scope	Consulting and implementations covering Microsoft SQL Cluster, NLB Cluster, IIS Application Server and Windows Application Fabric.
Technologies / value	SQL Server Cluster, NLB, IIS, Windows Application Fabric, Windows Server. Value: increased availability of applications and infrastructure services.

Project	University email migration to Exchange Online
Role	Consultant / implementer
Scope	Creation of around 5,000 user accounts and migration from Postfix to Exchange Online.
Technologies / value	Exchange Online, Microsoft 365, mail migration, user accounts. Value: transition from a local mail model to Microsoft cloud services.

TRAINING, EDUCATION AND TECHNICAL COMMUNICATION

The second pillar of the portfolio is educational activity. Training and academic experience makes it possible to combine project practice with the ability to explain technology to technical and non-technical audiences. This is especially important in migration, architecture and operations projects, where technology implementation alone is not enough - procedures, team awareness and good materials are also required.

Microsoft Certified Trainer

- Technical training delivery since 2004.
- Topics: SQL Server, administration, SharePoint, Microsoft 365, programming, Microsoft infrastructure.
- Preparation of original training materials, labs, checklists and implementation scenarios.

Academic lectures

- SGGW: software engineering, data warehouses, MS SQL Server administration.
- Warsaw School of Computer Science (WWSI): lectures and classes in SQL Server, database administration and C# programming.
- WSB University: designing security mechanisms for cloud services.

Original SQL Server e-books

- SQL Server Agent - Practical DBA Package, 2026 edition: technical e-book on SQL Server Agent administration, diagnostics and operational procedures.
- SQL Server Backup and Restore - Practical DBA Package, 2026 edition: technical e-book on backup strategies, recovery models, restore scenarios, testing, automation and good production practices.

Presentations and publications

- Author of the book "Office 365 w małej organizacji", Helion.
- Speaker: ShareCon365 2016, Microsoft Data Summit, Warsaw IT Days.
- Speaker at Microsoft Security Summit & Developer Days 2007 - presentation on PowerShell.

EDUCATION

- Warsaw School of Computer Science - Master of Engineering | November 2016. Thesis: "A concept of a knowledge base supporting IT system design processes in a selected technological environment".
- Warsaw School of Computer Science - Engineer | June 2011. Thesis: "Management system design for a foreign language center and partial implementation based on Windows AppFabric and Microsoft SharePoint 2010 Server".
- Post-secondary vocational studies - Programming | June 1994. Thesis: "Runtime error handling in Clipper".

CERTIFICATES AND COMPETENCY CONFIRMATIONS

- Microsoft Certified Trainer - active MCT status.
- Microsoft Certified: Azure Administrator Associate.
- Microsoft Certified: Azure Data Engineer Associate.
- Microsoft Certified: Azure Fundamentals.
- MCSE Data Management and Analytics.
- MCSA SQL 2016 Database Administration.
- Historical Microsoft certifications in SQL Server, .NET and Microsoft infrastructure.

TECHNOLOGIES

Databases and data platform

- SQL Server, T-SQL, SSIS, SQL Agent, backup/restore, SQL Server clusters, HA/DR, migrations, optimization.

Programming and integrations

- C#, ASP.NET Core, ASP.NET MVC, Entity Framework, PowerShell, Markdown, TypeScript, business applications, automation.

Microsoft 365 and collaboration platforms

- SharePoint Server, SharePoint Online, Microsoft Teams, Exchange Online, Power Automate, Microsoft Forms, Microsoft 365.

Infrastructure and tools

- Windows Server, Active Directory, IIS, Visual Studio Code, Visual Studio, Git, Azure DevOps, backup and storage solutions.

WORKING STYLE

- Diagnosis and environment understanding first, recommendation second, change third.
- Strong focus on documentation, checklists, repeatability, testing and reproducibility.
- Workshop approach: from production problem to procedure, script, training material or implementation standard.
- Combining technical language with communication for business and operations teams.

ADDITIONAL INFORMATION

- Knowledge of SCRUM and Function Point methodologies.
- Completed training in managing development teams.
- Interests: mountains, skiing, skydiving and aviation.

I consent to the processing of my personal data for recruitment purposes in accordance with applicable regulations.
